LAST CALL · CHICAGO · ROUND 2

Your feedback from this afternoon

Everything from your two emails on the afternoon of October 13, what was done about each, and where to see it. Close the app on your phone and open it again to get the new version. Screenshots use sample people and sample ratings.

#	WHAT YOU SAID	WHAT WAS DONE	PAGE
1	"map not working in app"	**Fixed and live.** A styling change from this morning pushed the map off the screen on phones.	2
2	Share to group chat should include a link or a plug to join	**Live.** The message now ends with a link to the app.	2
3	No way to report the age restriction on a bar	**Built. Turns on with today's database update.** Tap "Add it" next to the age tag.	3
4	Age features need the app to collect ages first	**Built. Turns on with the same update.** Add your date of birth on your profile; new sign-ups are already asked.	3
5	Cool idea: "this is when people are going", asked when you rate	**Built. Turns on with the same update.**	4

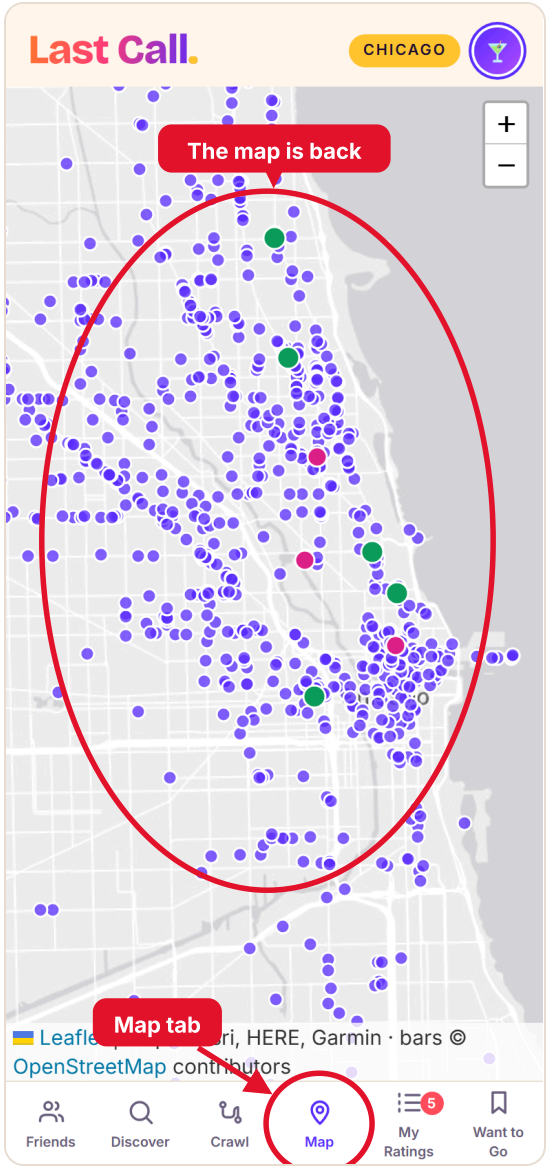

About "today's database update": items 3 to 5 store new kinds of information, so the database needs new columns and tables. Michael runs one file to add them. Until then the app hides those buttons, which is why you saw "no data on age yet" with nothing to tap.

ITEMS 1 AND 2

2 The map works on phones again, and shares carry a link

Map: this morning's change that floats the bar card over the map on a computer also, by mistake, moved the map below the bottom of the screen on phones, so the Map tab looked empty. That rule now only applies to wide screens. Checked at phone size: the map fills the screen and the pins are there.

Share to group chat: the text now includes everyone who is going and ends with a link, so someone who is not on the app yet can open it, make an account and tap "I'm in". Example of what gets sent is on the right.

What "Share to group chat" sends now

> Jordan, Alex and I are going to Cubby Bear tomorrow. Who's in?
> Say you're in on Last Call:
> https://mmanning1417.github.io/last-call-app/

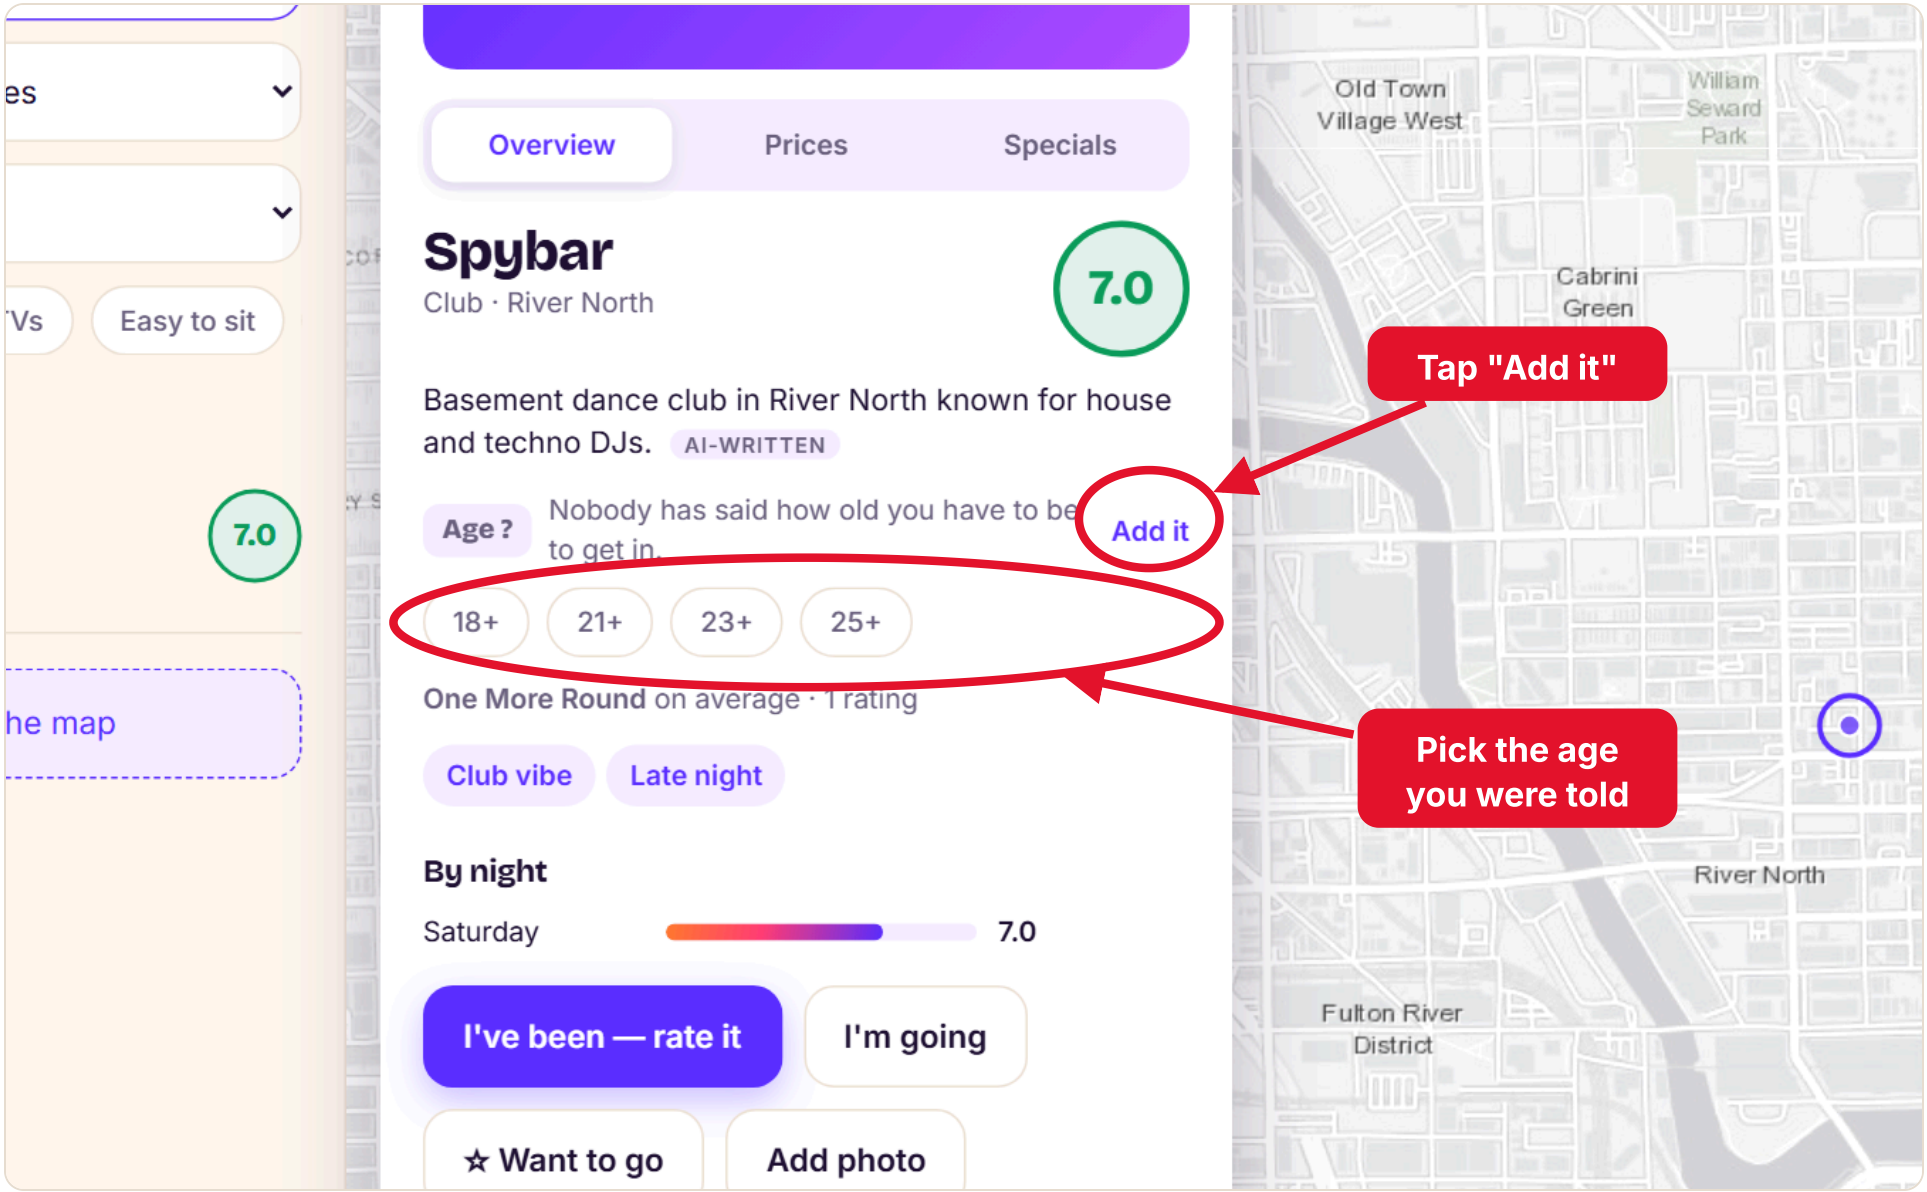

Before: "I'm going to Cubby Bear tomorrow. Who's in?"

ITEMS 3 AND 4

3 Reporting a bar's age restriction, and collecting ages

Reporting: next to the age tag on every bar there is a link: "Add it" when nobody has said, "Not right?" when someone has. It opens four choices (18+, 21+, 23+, 25+). The tag shows what most people picked and how many said so. You can change or take back your own.

Ages: the "Who goes here" age mix is built from the ages of the people who rated a bar. New accounts are asked their date of birth at sign-up. If you signed up before today, tap your photo at the top right, then "Edit profile", and add it. Friends see your age, not your birthday.

ITEM 5

4 When people go

When you rate: the rating screen has a new optional question, "When were you there?", with the time you got there and the time you left. Leave it blank if you do not remember.

On the bar: a "When people go" chart adds those up hour by hour and calls out the busiest hour. If someone only gives an arrival time, they are counted for two hours. It says how many people it is based on, and it stays hidden until at least one person has answered.
